

Theme 4

The Earth—Its Movements and Forms

This is what you have learnt earlier about the earth:

- It is a sphere and is part of the solar system.
- It moves around the sun in an orbit and it takes a year.
- It is very big but globes and maps help us to learn more about it.

In the next chapters you will learn a little more about the earth:

- The earth is made up of land and water and is surrounded by air.
- Plants, animals and people live on it.

- How to read and understand the special language of maps.

- How seasons and day and night happen.
