Descriptive Type Questions.

D) Answer the following.

Q. 1) Write the steps to copy a file from desktop to D: drive.

→ The steps to copy a file from desktop to D: drive are -

- a) Locate the file on the desktop.
- b) Right click the file and select copy.
- c) Open D: drive.
- d) Right click in the right pane and select paste.

Q. 2) What is the difference between copying and moving a file or a folder?

-
- Copying a file/folder means placing it in another location (destination) without removing it from its original location.
 - Moving a file/folder means shifting it from its original location (source) to another location.

Q.3) Mention the use of Recycle Bin.

→ The use of Recycle Bin is that the file is not permanently deleted, you can restore back the file to its original location using the context menu.

Q.4) What are the options available when you delete a file in File Explorer?

→ When you delete a file in File Explorer the two options available are Recycle Bin and permanently delete.

Q.5) What happens when you right-click while dragging a file or a folder?

→ When you right-click while dragging a file or folder, a menu appears that let you choose specific action such as, copying, moving, create shortcut etc.
