

10

Money

Tune In

Go to MyInspire for

Observe the information given below and fill in the blanks. Then make a bill for the items sold by a shopkeeper of Shoppers 99.

24 sets sold

Total amount = _____

Adult clothes

Price per set = ₹750

36 sets sold

Total amount = ₹8100

Costume jewellery

Price per set = _____

6 pairs sold

Total amount = ₹5562

Pair of shoes

Price per pairs = _____

Date: _____

Bill No: _____

S.No.	Name of the item	Price (per set/pair)	Number of items	Total amount (₹)
Total				

Based on the above, answer the following question.

Ravi has been saving the currencies shown on the right for the past month. He wants to purchase a pair of shoes shown above. Does he have enough money to buy shoes?

10 notes

8 coins

10 coins

14 coins

ADDITION AND SUBTRACTION OF MONEY

You have already learnt about addition and subtraction of money in the previous classes. While adding and subtracting money, take care to place the point one below the other, then add or subtract as we add and subtract other numbers. Look at the following examples.

Example 1: Add ₹192.50 and ₹58.50.

Solution:

$$\begin{array}{r} \text{₹} 192.50 \\ + \text{₹} 58.50 \\ \hline \text{₹} 251.00 \end{array}$$

Example 3: Shyam bought a pair of jeans and a shirt for his birthday. The pair of jeans cost ₹925 and the shirt cost ₹536. What was the amount spent by Shyam?

Solution: To find the total amount spent by Shyam we add the cost of the pair of jeans and the cost of the shirt.

$$\begin{array}{r} \text{₹} 925 \\ + \text{₹} 536 \\ \hline \text{₹} 1461 \end{array}$$

The total amount spent by Shyam was ₹1461.

Example 4: Amayra bought three storybooks, which cost ₹125.50, ₹78.50, and ₹133.50. She had ₹300 with her. Was ₹300 enough to pay for the books?

Solution:

$$\begin{array}{r} \text{₹} 125.50 \\ \text{₹} 78.50 \\ + \text{₹} 133.50 \\ \hline \text{₹} 337.50 \end{array}$$

The total cost of the three books is ₹337.50.

Amayra had only ₹300 with her. We subtract to find out how much more money she needs.

So, Amayra needs ₹37.50 more to pay for the books.

Example 2: Subtract ₹76.50 from ₹100.00.

Solution:

$$\begin{array}{r} \text{₹} 100.00 \\ - \text{₹} 76.50 \\ \hline \text{₹} 23.50 \end{array}$$

Let's Try! 1

1. Add ₹675.50 and ₹234.75.
2. Subtract ₹266.50 from ₹456.20.

We first find the total cost of the three books by adding.

The paise part adds up to 150 p = 100 p + 50 p = ₹1 + 50 p.

So, we write 50 in the paise column and take over ₹1 to the rupee column.

$$\begin{array}{r} \text{₹} 337.50 \\ - \text{₹} 300.00 \\ \hline \text{₹} 37.50 \end{array}$$

Add.
a. ₹163.50, ₹225.50
d. ₹234.50, ₹129

b. ₹524.50, ₹27.50
e. ₹111, ₹100.50, ₹56.50

c. ₹105.50, ₹125
f. ₹89.50, ₹456.75, ₹234.25

Subtract.
a. ₹643.50 - ₹194.50
d. ₹886 - ₹563.50

b. ₹225.50 - ₹139.50
e. ₹450.50 - ₹242

c. ₹981.50 - ₹563
f. ₹230.50 - ₹35

Application Based Questions

Anushka had ₹522.50 in her money bank. Her mother gave her ₹105 more. How much money does Anushka have now?

In a fair, Arnav spent ₹68.50 in the food stall and bought a toy for ₹147.50. How much money did Arnav spend in all?

Neeraj had ₹200 with him. He bought a box of colours for ₹149.50. How much money is left with Neeraj?

Madhu bought a dress worth ₹553.90, a wallet for ₹250.85, and a table cloth for ₹135.75. How much did she pay in all?

The price of a shirt has been reduced from ₹982.50 to ₹761.05. Find the difference in the price.

The price of a travel bag is ₹875.00 but Riya has only ₹790.50. How much more money does she require to buy the bag?

Manish went to watch a football match in a nearby stadium with ₹982. The ticket cost him ₹427. As he walked into the stadium, he bought a cold drink for ₹55. At the end of the match, he donated ₹250 to the charity club maintained by stadium officials. Find the amount of money left with Manish.

MULTIPLICATION AND DIVISION OF MONEY

We carry out multiplication or division of money using the same rules as for numbers and remembering to place the point.

Example 5: Multiply the following.

a. ₹45.50 by 2

b. ₹65.50 by 25

Solution: a.
$$\begin{array}{r} 11 \\ 45.50 \\ \times 2 \\ \hline 91.00 \end{array}$$

So, ₹45.50 × 2 = ₹91.00.

b.
$$\begin{array}{r} 65.50 \\ \times 25 \\ \hline 32750 \\ 131000 \\ \hline 163750 \end{array}$$

So, ₹65.50 × 25 = ₹1637.50.

Example 6: Divide the following.

a. ₹35.50 by 5

b. ₹846.00 by 36

Solution: To divide, we carry out the division without the point and then place it after the second digit from the right-hand side after division.

a.

$$\begin{array}{r}
 710 \\
 5 \overline{) 3550} \\
 \underline{- 35} \\
 05 \\
 \underline{- 5} \\
 00 \\
 \underline{- 0} \\
 0
 \end{array}$$

b.

$$\begin{array}{r}
 2350 \\
 36 \overline{) 84600} \\
 \underline{- 72} \\
 126 \\
 \underline{- 108} \\
 180 \\
 \underline{- 180} \\
 0
 \end{array}$$

Key Point

Place the point in the quotient to show the last two digits as paise.

So, ₹35.50 ÷ 5 = ₹7.10.

So, ₹846.00 ÷ 36 = ₹23.50.

Example 7: A magic show is being held in a school to raise money for those suffering from floods and pandemics in different states of India. Shafeeq and his sister Shabnam also attended the magic show with their parents. If each ticket costs ₹80.50, how much did they pay for the tickets?

Solution: The cost of one ticket = ₹80.50

The cost of four tickets = ₹80.50 × 4 = ₹322.00

Thus, the cost of four tickets is ₹322.

$$\begin{array}{r}
 ₹ 80.50 \\
 \times \quad 4 \\
 \hline
 ₹ 322.00
 \end{array}$$

Example 8: Rohit bought five chocolates for ₹177.50. Find the cost of each chocolate.

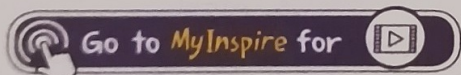

Solution: The cost of 5 chocolates = ₹177.50

The cost of one chocolate = ₹177.50 ÷ 5 = ₹35.50

The cost of each chocolate is ₹35.50.

Money need not always be paid in cash (currency notes and coins). Other methods of payment are by cheques, credit cards, or debit cards.

$$\begin{array}{r}
 3550 \\
 5 \overline{) 17750} \\
 \underline{- 15} \\
 27 \\
 \underline{- 25} \\
 25 \\
 \underline{- 25} \\
 0
 \end{array}$$

Teacher's Note

It is easier to carry out the multiplication and division without the point. The point can be placed in the answer to show the last two digits as paise.

Exercise 10B

Go to MyInspire and attempt question 1.

2. Multiply the following.

- a. ₹34.50 × 5
d. ₹51 × 14

- b. ₹63.50 × 7
e. ₹96.50 × 52

- c. ₹45.50 × 13
f. ₹15 × 27

3. Divide the following.

- a. ₹94.50 ÷ 3
d. ₹328.50 ÷ 15

- b. ₹116.50 ÷ 8
e. ₹454.50 ÷ 25

- c. ₹325.00 ÷ 4
f. ₹142.00 ÷ 15

Application Based Questions

- A bottle of milk cost ₹26.50. What will be the cost of 8 such bottles?
- Salma collected 12 g of junk items lying in her home. She sold those items to the local scrap dealers (*kabadiwala*). The scrap dealer agreed to pay her 11.50 for 1 kg. Find the total amount paid by the dealer.
- "A good education can change anyone. A good teacher can change everything." On Teachers Day, grade 4 students plan to give pens to teachers as a token of gratitude. The students bought 10 packets of pens—a packet of pens cost for ₹382.50. If the packet contains 15 pens, find the cost of each pen.
- Anushka, Saurabh, and Kavita went to an amusement park. If they paid ₹826.50 for the tickets, find the cost of one ticket.
- Surbhi bought 12 kg of sugar for ₹546. What is the cost of 1 kg of sugar?
- Forty-two children of Class 4 went on a field trip to the local ice-cream factory. The amount was collected through cheques. If the total amount collected for the trip was ₹9252.60, how much did each child pay?

BILLS

We have already learnt about bills in Class 3. Let us recall.

A bill contains the following details:

- Date of purchase
- Name of the shop
- Bill number
- Name of the items purchased
- Cost of 1 item (rate)
- Quantity purchased
- The total amount to be paid

Let us look at the bill given below and answer the questions that follow.

Date: 12/05/2022		Forever Fresh		Bill Number: 55
S. No.	Item	Quantity	Rate (in ₹)	Amount (in ₹)
1.	Apple	2 kg	145	290.00
2.	Pomegranate	1 kg	160	160.00
3.	Orange	2 kg	60	120.00
Total				570.00

- When was the purchase made? 12/05/2022
- What is the name of the shop? Forever Fresh
- What does the number 55 mean? It is the bill number.
- What does the shop sell? Fruits
- What were the fruits purchased? Apple, pomegranate, and orange.
- What was the cost of 1 kg of orange? ₹60
- How many kilograms of apples were purchased? 2 kg
- Which is the most expensive fruit? Pomegranate
- What is the total amount of the bill? ₹570.00

Estimating Cost

Let us look at the following example to see how can we estimate the total cost of items we buy.

Example 9: A customer bought the following provisions at the A to Z Store on 1st April, 2022.

3 kg rice at ₹59.00 per kg, 2 kg atta at ₹49.00 per kg, and 1 L oil at ₹176.50 per litre. By estimating the cost of each item, find the approximate total cost. Find out whether ₹500.00 will be enough to pay for the purchases. Prepare the bill for the purchases and compare the estimation and the bill. If yes, what was the balance returned to the customer? If no, how much more did the customer have to pay?

Solution: Estimation of the cost of each item and total cost is as given below.

Rounding off to the nearest tens.

The cost of 3 kg rice at ₹60 = $3 \times ₹60 = ₹180$

The cost of 2 kg atta at ₹50 = $2 \times ₹50 = ₹100$

The cost of 1 L oil at ₹180 = ₹180

The estimated total cost = ₹180 + ₹100 + ₹180 = ₹460

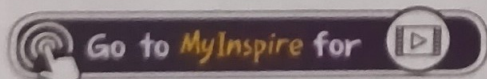

The customer needs approximately ₹460 to buy the given items and he has ₹500 with him which is more than the estimated cost. So, he will get approximately ₹40 as the balance.

The exact bill is given below.

Date: 01/04/2022		A to Z Store		Bill Number: 28
S. No.	Item	Quantity	Rate (in ₹)	Amount (in ₹)
1.	Rice	3 kg	59.00	177.00
2.	Atta	2 kg	49.00	98
3.	Oil	1 L	176.50	176.50
Total				451.50

The exact balance amount = ₹500 - ₹451.50 = ₹48.5

The customer will get ₹48.5 as balance from the shopkeeper.

Exercise 10C

1. Salim's mother bought 2 kg potatoes, 3 kg tomatoes, 1 kg onions, and 1 kg carrots from the supermarket "Vegetable Fresh". The cost per kg is ₹25.00 for potatoes, ₹60.00 for tomatoes, ₹30.00 for onions, and ₹27.00 for carrots. Estimate the cost of each item and the total cost. Prepare the bill and find out how much she had to pay for the vegetables. She gave two ₹100 notes and two ₹20 notes to the shopkeeper. Find out whether she had to pay more or she got the balance and if so how much?

2. Rayan's mother was planning to celebrate his birthday by inviting 20 of his friends. She prepared a list to buy things from "The Party Corner". The price list of some items was displayed in the shop. Help her to estimate the cost of items. Prepare a bill and find out the amount she has to pay for the items.

The Party Corner	
Item	Cost of 1 item
Party balloons (Pack of 10)	₹22
Birthday cap	₹18
Toy car (Set of 2)	₹25
Decoration roll	₹14
Toy scooter	₹65
Teddy bear	₹125
Donald duck bag	₹75
Pencil set	₹65
Packet of cookies	₹17
Chocolate bar	₹12

Birthday party items list

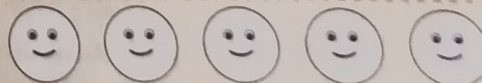

1. Party balloons 30
2. Decoration rolls 5
3. Birthday caps 20
4. Chocolate bars 20
5. Cookies 20 packs
6. Small toy cars 20

Let's Review

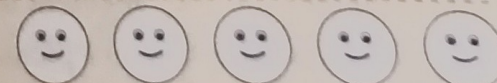

Come here after you have completed the chapter. Colour 1 to 5 😊 to show how well you understand a topic. (5 😊 = Very well; 1 😊 = Not at all)

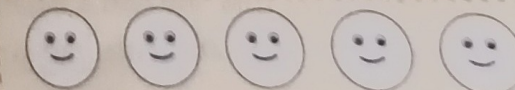

Addition and Subtraction of Money

Multiplication and Division of Money

Bills

Revision Exercises

Start Up

1. Fill in the blanks.

- The sum of _____ notes of ₹500 means a total amount of ₹2000.
- $₹4590 + 0 = 0 + \underline{\hspace{2cm}}$.
- If 1 water bottle costs ₹120.50, then the cost of 6 such water bottles, is ₹_____.
- The estimated cost of a bed sheet is ₹_____, if its actual cost is ₹587.50.

2. Add.

- | | |
|-------------------------------|--------------------------------|
| a. ₹125.50 + ₹67.50 | b. ₹592.50 + ₹354.00 |
| c. ₹248.50 + ₹588.00 | d. ₹375.00 + ₹206.50 + ₹194.00 |
| e. ₹216.50 + ₹77.00 + ₹506.50 | f. ₹101.00 + ₹639.00 + ₹147.00 |

3. Subtract.

- | | | |
|----------------------|----------------------|----------------------|
| a. ₹697.00 - ₹485.50 | b. ₹306.50 - ₹298.00 | c. ₹558.50 - ₹319.50 |
| d. ₹719.00 - ₹493.00 | e. ₹300.00 - ₹199.50 | f. ₹750.00 - ₹455.50 |

4. Multiply.

- | | | |
|---------------|---------------|---------------|
| a. ₹25.50 × 8 | b. ₹91.50 × 4 | c. ₹65.00 × 5 |
| d. ₹98.00 × 3 | e. ₹15 × 16 | f. ₹44 × 23 |

5. Divide.

- | | | |
|-----------------|-----------------|-----------------|
| a. ₹54.00 ÷ 9 | b. ₹36.50 ÷ 5 | c. ₹66.50 ÷ 7 |
| d. ₹121.50 ÷ 27 | e. ₹720.20 ÷ 55 | f. ₹900.00 ÷ 36 |

Level Up

1. Solve the following word problems.

- Rahul and his three friends went to a carnival. It cost each of them ₹75.00 for rides and ₹150.00 to play games. In addition, they spent a total of ₹978.00 on food. How much money did they spend in all?
- Harish's class had gone on a picnic last week. After calculating the expenses, the teacher found that she had a balance of ₹399 with her, which had to be returned to the students. If 38 students had gone on the picnic, how much will each student get?

- c. Pratap, his wife, and two children spent a day at the water theme park in their locality. The entry fee for an adult is ₹125 and for a child is ₹75. If Pratap spent ₹250 for the water games and ₹170.50 for snacks, how much did he spend in all?

2. Abdullah bought 3 kg salt, 6 kg washing powder, and 5 kg wheat flour. The rates for the items he bought are as follows:

Salt: ₹25.00 per kg

Washing powder: ₹243.00 per kg

Wheat flour: ₹147.00 per kg

Estimate the cost of each item and the total cost. Prepare the bill and find out how much did he spend in total?

3. Reema likes chocolate-flavoured treats. How much money would she need to eat 12 chocolate candies daily if 1 chocolate candy cost ₹2.50.

- What will happen, if she consumes 12 chocolate candies every day?
- Which food category do toffees belong to? Does eating candies every day benefit our health?
- What kind of diet do you follow every day—junk or healthy?

HOTS Questions

- Shweta, her brother Sumant, their parents, grandfather, and grandmother went to a theme park. The board at the ticket counter gave the following rates per ticket: For children up to 14 years: ₹75.00; for persons less than 60 years: ₹100.00; for adults 60 years and more: ₹60.00. Shweta is 13 years old and her brother is three years younger than her. Their grandmother is 58 years old and grandfather is 62 years old. How much did they pay for the tickets?
- Rohan has ₹275 and Kavita has ₹125. How much should Rohan give to Kavita so that both have an equal amount?

[illegible][illegible]
