

TREE HOUSE HIGH SCHOOL, SHEWALEWADI
SUBJECT: SOCIAL STUDIES
CH-12: POLITICAL DIVISIONS OF NORTH-EAST INDIA

Q: Answer the following questions:

1) Why are the states in the north-east so green?

Ans – States in the north-east are so green as they get heavy rains.

2) What is the difference between jhoom and terrace farming?

Ans – In jhoom cultivation farmers clear forests by burning them to grow crops. After cultivating the land for a few years, it is abandoned so that the soil can get fertile again. Farmers then shift to a new place to a new place to repeat this cycle again. When land is made into terraces to grow crops, it is known as terrace farming.

3) Name the neighbouring countries the north-eastern states share a border with.

Ans – The neighbouring countries that the north-eastern states share a border with are Bhutan, Nepal, Bangladesh and Myanmar.

4) What are the common occupations of the people in the north-eastern states?

Ans – Farming and small-scale industries are the common occupations of the people in the north-eastern states.

5) What is sericulture?

Ans – Sericulture is rearing of silkworms for silk.

6) Why is there a fruit preservation industry in these states?

Ans – There is a fruit preservation industry in these states as lots of fruits grow there.

Q: Picture Study

1) Identify the different bamboo-made objects in these pictures.

Ans – Slippers, drip irrigation, flute and fence.

2) In what other ways the bamboo plant is used?

Ans - The bamboo plant is used in furnitures, paper making, handicrafts and tools, etc.

3) Why is it used in so many different ways?

Ans – Because it is strong but light and it grows very fast and also easily available, and also every part of bamboo is useful.
