

Ch -		Date
16	People in India	09/10/2025
		Day - Thursday

Topics

1) Food

2) Festivals

3) Languages

4) Population

5) Unity in Diversity

New words

1) Diverse - with a lot of variety, very different

2) Unite - to join together

3) Staple - a large or important part of something, like food or diet

4) Harvest - the time when crops are cut and gathered

5) Population - all the people in a particular area

Thursday
C.W
9/10/25

* Topics:-

- Food.
- Festivals.
- Languages.
- Population.
- Unity in Diversity.

* New words:-

- 1] Diverse : with a lot of variety;
very different.
- 2] Unite : to join together.
- 3] Staple : a large or important
part of something, like
food or diet.
- 4] Harvest : the time when crops
are cut and gathered.
- 5] Population : all the people in a
particular area.

29/10/25
classwork
6] Dense

: containing a lot of people, things, plants, etc. in an area.

* Answer the following questions:-

1] Name two parts of India where people are mostly (a) vegetarian and (b) non-vegetarian.

→ Two parts of India where people are mostly vegetarian are Haryana and Rajasthan. Two parts of India where people are mostly non-vegetarian are West Bengal and Kerala.

2] What does festival mean? Name three Harvest festivals.

→ Festival means a time of celebration. Three Harvest festivals are Baisakhi, Pongal and Bihu.

3] Give two reasons why English is one of the languages in India.

→ Since the British ruled India for many centuries, English is spoken in many parts of India and used in offices and

institutions. It also helps in communicating with people for many parts of the world.

4] Name one region each in India with low and very high density of population

→ One region in India with low population is the northern mountains and one with very high density of population is the northern parts.

5] Explain why the constitution unites India?

→ The constitution unites India since it has rules and laws that are same for all Indians.

6] Give one example of laws that applies to all Indians.

→ One example of a law that applies to all Indians that according to the constitution all Indians are equal whether they are rich or poor men or women or of any religion.

Chapter

8

Topic: 4

Motions of the Earth.

30/10/25

Friday

* Topics covered:-

- The earth's axis.
- Leap year.
- Rotation causes day and night.
- How the seasons happen.
- Revelutions.
- The rhythms of the earth's movements.

* New words:-

Tilted

:

sloping; this is a tilted line: /

Vertical

:

absolutely straight
this is a vertical
line: |

Hemisphere

:

half a sphere.

Rhythm

:

regular movement

CW
4/11/25

* Hard words: →

- 1) Rotation. the axis of the earth?
- 2) Revolution.
- 3) Vertical
- 4) Tilted
- 5) Hemisphere
- 6) Leap year.
- 7) Polar day.
- 8) Rhythm.
- 9) Spinning.
- 10) Horizontal.

E. Answer the following questions.

1] What is the axis of the earth?

→ The axis of the earth is an imaginary line that passes through the center of the earth and the two poles.

2] How long does the earth take for one rotation?

→ The earth takes 24 hours to complete one rotation.

3] What does the rotation of the earth cause?

→ The rotation of the earth causes day and night.

4] What is the earth's revolution?

→ Movement of the earth around the sun is called revolution.

5] How long does the earth take for one revolution?

→ It takes 365 days and 6 hours to complete one revolution around the

sun. This is why a year has 365 days.

6] Write a short paragraph to explain why a leap year has 366 days.

→ A year has 365 days, but the earth takes 365 and 6 hours for a complete orbit around the sun. The 6 extra hours from each year are added up. In four years these become 24 hours ($6 \times 4 = 24$). These 24 hours are equal to one day. This is an extra day. The extra day is added to the month of February which has 29 days in a leap year. Therefore, a leap year has 366 days.

C.W

8/11/25

7] Give two reasons why summer and winter happen?

→ Two reasons why summer and winter happen are because of the tilt of the earth's axis and the orbit of the earth around the sun.

8] Why is the northern hemisphere (a) hotter than the southern hemisphere during summer and (b) colder than the southern hemisphere during winter?

C.W
8/11/25

→ a) The northern hemisphere is hotter than the southern hemisphere during summer as summer is in June in the northern hemisphere and it is tilted towards the sun and the rays of the sun fall directly on it. The southern hemisphere during the same time is tilted away from the sun and the sun's rays fall less directly on it.

b) The northern hemisphere is colder than the southern hemisphere during winter is in December and the northern hemisphere is tilted away from the sun and the sun's rays fall less directly on it. The southern hemisphere during the same time is tilted towards the sun and the sun's rays fall directly on the hemisphere.

g) What happens in the North Pole during summer?

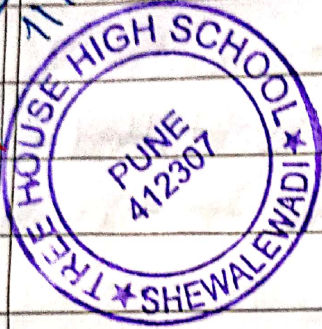

→ The North Pole has summer in June. During this time, the sun never sets there and the North Pole and its surrounding areas have continuous day and no night. This is called Polar day and

C.W
8/11/25

sun is called midnight sun.

Chapter -	Topic :-	24/11/25
7	Types and Elements of Maps	Monday

* Hard words:-

- 1) Accurate.
- 2) Physical.
- 3) Political.
- 4) Thematic.
- 5) Scaling.
- 6) Representation.
- 7) Legend.
- 8) Symbol.

* New Words:-

- 1- Accurate :- Without any mistakes.
2. Scale :- the connection between the actual size of something and its size on a map.

3- Legend:- the explanation of a map.

4- Symbols :- sign that have a meaning in maps.

C.W

25/11/25

* Answer the following questions.

1] What is a map?

→ A map is a special drawing of a place that give a lot of information about the earth.

2] What helps to make accurate maps?

→ Scales help to make accurate maps.

3] Why is it important for maps to be accurate?

→ Maps have to be accurate as they give information about the maps.

4] If a scale in a map says $1\text{cm} = 150\text{km}$, what does this mean?

→ If a scale in a map says $1\text{cm} = 150\text{km}$ it takes about the connection between the actual size of something and the size of something and the size that is drawn on the map.

5] Explain in two sentences how the colours and symbols in maps are useful.

→ Colours in maps are useful because they help us to understand a map and symbols are useful as they are special signs used in maps. Colours and Symbols both help us to read and understand maps.

6] Which are the four main directions and the four additional directions?

→ The four main directions are north, south, east and west. The four additional directions are north-east, south-east, south-west and north-west.
