

13 More about Solid Shapes

Tune In

- There is only one curved face and no vertices of the shape I am looking for, but it has the same edges and flat faces: **Cylinder**
- I am looking for a shape that has 12 edges, 6 faces and eight vertices, but all faces look the same: **Cube**
- In the shape I am looking for, there are 12 edges, six faces and eight vertices, with the opposite faces equal in appearance: **Cuboid**.
- There should be no edges or flat surfaces in the shape I am looking for, it has only one curved face: **Sphere**.
- The shape I am looking for must have a similar number of edges, flat surfaces, curved surfaces and vertices. People wear objects of this shape at parties: **Cone**

Let's Try

Which of the following nets will form a closed cuboid?

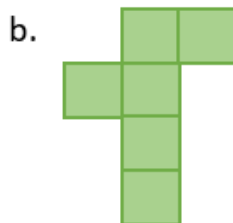

Ans: 2.

Exercise 13A

3. The figure that the given net will make is a cuboid.

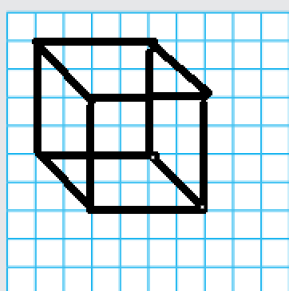

Application Based Questions

4. a, b, d and f, when folded will make a cube.

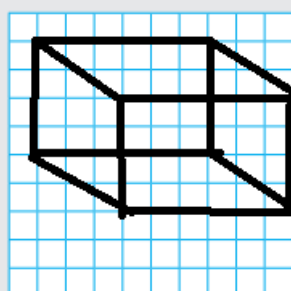

Exercise 13B

1. Cube

2. Cuboid

Exercise 13C

3.

	Top	Front	Side
a.			
b.			
c.			
d.			

Revision Exercises

Start Up

1.a. (i) b. (ii) c. (ii)

2.a. cube b. cone c. cylinder d. cuboid

Level Up

1. Students can take a dice, a pencil box, and a birthday cap and draw their front, top and side views.
2. The two girls could see different walls of the house, because there was a difference in their views. While Rubina saw the side view of the house, Priyal noticed the front view so she could see only one wall of the house.

HOTS Questions

1, 2 and 3 will not make a cube.
