

TREE HOUSE HIGH SCHOOL, SHEWALEWADI, PUNE
REVISION WORKSHEET 1 FOR MIDTERM
GRADE: IV
SUBJECT: SCIENCE

Section A – Multiple Choice Questions (MCQs)

1. The organ that absorbs water from undigested food is the:
a) Stomach
b) Small intestine
c) Large intestine
d) Kidney
2. Plants that grow in deserts usually have:
a) Broad leaves
b) Spines instead of leaves
c) Weak stems
d) Aerial roots
3. Penguins are found in:
a) Deserts
b) Polar regions
c) Mountains
d) Forests
4. The kidney helps in:
a) Breathing
b) Removing waste from blood
c) Breaking down food
d) Pumping blood

Section B – Assertion and Reasoning Questions

1. **Assertion:** Camels can survive in deserts.
Reason: They store water in their hump.
2. **Assertion:** Small intestine is an important part of the digestive system.
Reason: It absorbs nutrients from digested food.
3. **Assertion:** Mangrove plants grow in coastal areas.
Reason: They have aerial roots to absorb oxygen.

Section C – Name the Following

1. The organ where digestion of food begins – _____
 2. A plant found in water bodies – _____
 3. The organ that stores urine – _____
 4. An animal found in snowy regions – _____
 5. A desert plant with spines – _____
-

Section D – Match the Following

A B

1. Kidney | a) Absorbs nutrients
 2. Small intestine | b) Thick fur and fat
 3. Polar bear | c) Stores fat in hump
 4. Camel | d) Removes waste from blood
 5. Mangrove plant | e) Aerial roots
-

Section E – Choose the Correct Word to Fill in the Blanks

1. The process of breaking down food into simple substances is called _____ (digestion / excretion).
 2. Dolphins breathe through a _____ (gills / blowhole).
 3. The organ that churns food and mixes it with digestive juices is the _____ (stomach / kidney).
 4. Cactus has _____ (spines / broad leaves) instead of leaves.
 5. The _____ (large intestine / lungs) absorbs water from undigested food.
-

Section F – State True or False

1. Excretion is the process of removing undigested food from the body. (____)
2. Evergreen plants shed their leaves in winter. (____)
3. Yak is adapted to live in mountains. (____)
4. Urine is stored in the bladder. (____)
5. Aquatic plants have spines to reduce water loss. (____)
